

XPONENTIAL™

MAY 8 - 11, 2023 | EDUCATION
MAY 9 - 11, 2023 | EXHIBITS
DENVER, CO

UNIVERSITY ROW

Academic institutions dedicated to education and innovation make for natural partners with high-tech industries, like the uncrewed and autonomous industry — from meeting the future workforce need, to spearheading and partnering on education. Academia is essential for the advancement and growth of our industry.

XPONENTIAL 2023 provides universities a global stage to demonstrate their commitment to collaboration and technological excellence. **Five tools for universities to engage and advance the industry:**

UNIVERSITY ROW

The University Row is a dedicated hub on the XPONENTIAL show floor for universities to highlight their uncrewed and robotics program for workforce education and re-education, research capabilities and industry partnerships. Don't miss your opportunity to show the industry that your academic institution is the partner for the future.

SANDBOX LEARNING LAB

The Sandbox will foster collaboration and partnerships between academic institutions, industry leaders, and researchers to problem-solve and seek solutions in the field of autonomous systems. This is your chance to utilize XPONENTIAL to gain insights from industry stakeholders. Learn more at **XPONENTIAL 2023 Sandbox Submission**.

AUVSI is a community of uncrewed systems innovators and leaders. AUVSI membership gives you unparalleled access to information, resources, and connections. Join AUVSI with a special membership just for educational institutions. Visit www.auvsi.org/members to get started.

Become a TOP Accredited Training Provider. The AUVSI Trusted Operator Program (TOP) fills the gap between Part 107 in the U.S., or similar regulatory frameworks around the world, and a higher level of demonstrated knowledge, flight proficiency, safety and risk management practices. AUVSI and industry experts have identified a set of protocols that should be used as a benchmark for UAS training and operations, and AUVSI accredited training partners develop the curriculum to educate to that standard.

As a result, students will become more employable to industry, yielding safer operators for the future. AUVSI is looking for high quality institutions that have demonstrated their commitment to remote piloting excellence to become a part of the TOP Certification process. Learn more at auvsi.org/topoperator

AUVSI offers the most robust global database of uncrewed vehicle platforms with information on size, performance specifications, integrated payloads/subsystems and manufacturer data. The USRD includes more than 50 parameters on over 8,000 vehicle models spanning the air, ground and maritime domains. Universities subscribe to the database to power student research projects and industry research & partnerships. Learn more at auvsi.org/usrd
